

## LIMITED WARRANTY

Fastco warrants that its wheels will be free from structural defects for as long as the original purchaser owns the product. Fastco further warrants to the original purchaser that its wheels will be free from cosmetic defects for a period of one year from the date of purchase.

This warranty shall be valid only when the wheels are returned to an authorized Fast Wheels dealer or to Fastco's head office, freight prepaid, along with the original proof of purchase.

Fastco's obligation under this warranty shall be limited to the replacement or repair of any wheel which in Fastco's opinion is considered to be defective.

Fastco shall inspect all warranty returns. Wheels covered by our warranty shall be replaced or repaired and returned to the sender freight prepaid. Wheels not covered by our warranty will be returned to the sender freight collect.

### What is covered?

- a) Peeling of the clear coat, paint or chrome on the face of the wheel.
- b) Wheels with a radial or lateral run-out greater than 0.020 inch, provided there is no evidence of impact.
- c) Stress cracks in the wheel, provided there is no evidence of impact.
- d) Bubbles in the paint or chrome or other blemishes in the finish of the wheel.
- e) Wheels that leak air.
- f) Improper machining of the center bore or bolt holes.

### What is not covered? (Exclusions)

- a) Peeling of the clear coat, paint or chrome on the back of the wheel.
- b) Wheels with a radial or lateral run-out less than 0.020 inch.
- c) Wheels damaged or knocked out-of-round due to: tire installation, lowered suspension, impact, off-roading, accident, racing, negligence, misuse or exceeding the load rating or tire diameter (see installation instructions).
- d) Pitting, corrosion or surface rust in the finish of the wheel caused by neglect (see wheel maintenance guidelines).
- e) Scratches, stone chips, sidewalk burns or other marks in the finish caused by road hazards.
- f) Paint chipping around the bolt holes due to installation with an impact gun.
- g) Cosmetic defects greater than one year from the date of purchase.
- h) Cosmetic warranty for wheels purchased as "blemished" (structural warranty still applies).
- i) Wheels claimed by someone other than the original purchaser.
- j) Wheels transferred to another vehicle, resulting in an improper fitment.
- k) Wheels that have been repaired, altered or used with adapters and / or spacers.
- l) Wheels that have been damaged in transit.
- m) Wheels where the installation instructions have not been followed (supplied with each wheel).
- n) Wheels that have been installed with other than Fastco approved accessories.

This warranty is given by Fastco and is in lieu of all other expressed warranties, whether oral or written. All implied warranties, such as warranties of merchantability or fitness of a particular purpose, shall be limited to the duration of this warranty.

Some States and / or Provinces do not allow limitations on how long an implied warranty lasts, and / or the exclusion or limitation of incidental or consequential damages, so one or more of the above limitations or exclusions may not apply to you.

This warranty is non transferable and expires upon title transfer of any Fastco products by the original purchaser. No warranty or representation by anyone other than Fastco shall be binding upon Fastco.

**This shall be the limit of the liability of Fastco for defective goods and under no circumstances shall Fastco be responsible for any damages whatsoever, including consequential damages, economic damages, or lost profit.**

Fastco is a division of 168406 Canada Inc.

### CUSTOMER INFORMATION

After your wheels have been installed, make sure the installer completes the checklist on the installation instructions supplied with each wheel, and that you have verified each step with him. Remember to retorque your nuts / bolts after 40 kilometers (25 miles) of use. Failure to retorque them is unsafe and could cause a serious accident. Nuts and bolts must be retorqued every time they are installed.

If you hit a curb or pothole, or have an accident and suspect structural damage, have your wheels inspected immediately by a licensed mechanic. If structural damage is found, replace the wheel immediately.

Keep this document with the owner's manual and give it to the new owner when the vehicle is sold.

### WHEEL MAINTENANCE GUIDELINES

Custom wheels require special care in order to keep them in good condition. Proper wheel maintenance will prevent peeling, pitting, corrosion and surface rust. In order to protect your wheels' finish from deterioration and to prevent your warranty from being voided, we recommend that you follow these few steps:

1. Wash your wheels on a weekly basis with non-detergent soap and water, using a soft brush or sponge. Cleaning your wheels frequently will remove salt, dirt and brake dust that can be corrosive to the finish.
2. Do not use chemical or abrasive cleaners or mag wheel polishes. Only cleaners designed for clear coated wheels should be used. All Fast Wheels (except for chrome) have a clear coating applied at the factory to protect their finish and make them easier to clean. Most cleaners are too harsh for this coating as they have an acid or lye base. We recommend that you follow the manufacturer's recommendations on the bottle for safe and effective use. For chrome wheels, a coat of non-abrasive cream or wax should be applied after cleaning to prevent peeling, pitting, corrosion and / or surface rust.
3. Beware of car washes that use steam cleaners, scouring pads, bristle brushes and / or tire cleaners. High temperatures, rough cleaning materials and harsh chemicals can cause permanent damage to your wheels.
4. Never spray cold water on extremely hot wheels. Allow your wheels to cool before cleaning them. Extreme temperature changes can cause deterioration to the finish.
5. Remove your Fast Wheels for the winter and install a set of winter wheels or use your original factory wheels. Snow, slush, sand and road salt are hard on custom wheels and will destroy a wheel's finish in a short period of time.
6. Ensure your Fast Wheels are washed, dried and placed in a clean bag and stored in a dry place for the winter.
